The International Standard For more than 100 years Carver hydraulic presses have been the standard for laboratories around the world. Carver Model C presses alone are in use in more laboratories than any other press. The current Carver line has been expanded and improved with more sizes, options, features, and quality performance than any other line of presses.

The Widest Choices Standard choices now include two-column and four-column, benchtop and floor standing, and manual or automatic presses with clamping capacities from 0.5 to 100 tons. Automatic "Auto Series" presses include a user-friendly control system and integral safety enclosures. Accessories include self-contained, electrically operated AutoPak hydraulic power units for existing manual Carver presses.

Applications —

• **Materials research:** ceramics, composites, construction materials, cosmetics, drugs, pharmaceuticals, powder metals, printed circuit boards, rubber, silicone and other elastomers, soil, thermoplastic resins and thermosets

• **Quality and performance testing of physical properties:** compression strength, flexural strength, shear strength, flow and color dispersion

• **Laboratory testing:** ASTM test plaque or bar molds for polyethylene & polypropylene

• **Other applications:** composite molding, compression molding, crushing, laminating, encapsulation, extrusion, forming, insert pressing, producing KBr pellets for infrared spectroscopy, metal forming (dimpling), insert molding, oil extraction, pelletizing, specimen preparation, splice

molding, splitting chilled oils, transfer molding, and vulcanizing

Specialized Applications Special presses dedicated to specific applications include ASTM test plaque or bar molding, pellet making (KBr specimens for infrared and x-ray spectroscopy) and laminating.

Custom Presses In addition to the models shown in this catalog, Carver designs and manufactures a wide variety of custom made presses and accessories to suit your specific application. Please consult the factory for any equipment not specifically listed in this catalog.

More Choices, More Features, More Performance

Integral Safety Shield
Contemporary styling and safe operation

Access Door
Clear shatter resistant polycarbonate door permits observation while protecting the operator

Heated Platens
Optional digitally controlled, cartridge heated platens

Door Interlock Switch
Prevents operation when safety shield is open

Color Touch Screen Interface
For precise, programmed process control

Enclosed Hydraulic Power Unit
Self-contained hydraulic system

Catalog No. 3891 PL
Auto M-PL,H
25 ton capacity

How to select the right Carver press for your application:

- Determine if you want a general laboratory press or one dedicated to a special application.
General pages 4, 5, 6, 8, 9
Special pages 7, 10, 11
- Determine clamp force and choose benchtop or floor standing model.
Benchtop
 7.5 to 30 tonspages 4, 5, 7, 8, 9, 10, 11
Floor Standing
 30 to 100 tons page 6
- Decide if heated platens will be needed.
Heated Floor Models pages 6, 11
Benchtop pages 5, 8
Unheated Floor Models page 6
Benchtop pages 5, 9
- Refer to specification tables for appropriate work area (platen size) and daylight opening (working height between platens).
- Refer to photos and descriptions to select two- or four-column configuration.
- Select heat control level desired and platen options on page 12.
- Refer to pages 12 thru 15 to select appropriate accessories for your application.
- Note the catalog numbers of your selections on your letterhead and email to: carverpress@acscorporate.com
 Or, contact us for prompt assistance:
 Phone: 260-563-7577
 Fax: 260-563-7625

CARVER®

Auto Series Compact Automatic Benchtop Presses 15 to 48 ton capacity

Automatic hydraulic laboratory presses in two- and four-post models up to 48 ton clamp capacity

Carver's Auto Series presses bring a world of power and control options to your lab

Carver has incorporated over 100 years experience in laboratory presses into their automatic electrically powered benchtop presses for today's labs. Each Auto Series Plus press has a built-in hydraulic system with a control system for accurate programmable operation. A variety of models are available ranging in clamp force capacity from 15 to 48 tons and work areas ranging from 6" x 6" to 18" x 18". Press models include two- or four-column, pelletizing, heated, unheated and cooled configurations. All presses have integral safety enclosures with a clear front door for operator safety and observation. AutoPak power units are available for existing manual presses (see page 16).

A Complete Line of Automatic Electrically Powered Benchtop Presses for the Laboratory or Manufacturing Facility

Carver, Inc. introduces their New Auto Series Plus Automatic Hydraulic Laboratory Presses. These new presses feature a 7" color operator interface, enhanced platen temperature control with auto-tuning, ramp heating capability, and real-time trending of force and temperature. Another enhancement includes storage of up to 250 recipes with recipe preview. Optional features include data logging for cycle parameters and a seven day timer for auto platen heat-up.

Auto Series Plus press models are available with 15 to 48 tons of clamping force and 6" x 6" to 18" x 18" platens. These benchtop presses are used in quality control, research and development for test sample preparations, destructive testing, molding, laminating and fluid extraction.

- Large 7" color touch screen operator interface
- Storage of up to 250 recipes
- Enhanced platen temperature control with auto-tuning
- Ramp heating capability
- Recipe preview
- Real-time trending of force and temperature
- Seven day timer for auto platen heat-up (optional)
- Datalogging of cycle parameters (optional)
- Access to logged data through Wi-Fi (optional)
- 48 ton models include an integral wrap-around floor stand

Auto Series "PL" Control Panel

Color Touch Screen Interface

Degree setting for Fahrenheit and Celcius

Units of measure setting for lbs., Kg., U.S. tons & metric tons

CARVER®

Monarch Hydraulic Lab Presses

30, 50, 75, 100 ton capacity

Carver's Monarch laboratory presses with integral hydraulic system and high technology options are based on standard production press models adapted to precision laboratory requirements.

Recommended for testing or research, compacting, molding rubber or plastic, laminating and assembly where stripping force is required.

Standard features include double-acting JIC style cylinder for power open and power close. An integral hydraulic reservoir is easily accessible for cleaning and includes a strainer or cartridge filter, air filter/breather, oil level indicator and oil cooler. A programmable controller with access module is standard.

Optional equipment includes electrically heated platens to 500°, 650°, 800° or 1200° F, with digital temperature controllers, low pressure system, pressing speed control and automatic platen cooling.

Presses for Special Applications

Model "B"
3710-ASTM

No. 4391-ASTM
with Safety Shield

No. 4393-ASTM &
No. 4394-ASTM
with Safety Shield

Molding ASTM Test Specimens Plastics, elastomers and other materials

Carver has developed three presses which are specially configured to perform the compression molding of test plaque or bar specimens of Type I, II, III or IV polyethylene and other thermoplastic resins. The procedure is in conformance with ASTM Method D 4703, Procedure C. The presses are equipped with heating/cooling platens and a programmable digital controller which has a heating/cooling loop for each platen and built-in program for the required 15°/minute $\pm 2^\circ\text{C}$ cooling rate.

■ CMG 30H-12 ASTM Model B, 30 tons

Floor standing, four-column, automatic press with heating/cooling platens and programmable controller.

■ No. 4391-ASTM Model 12-12H-ASTM, 12 tons

Benchtop, four-column manual press with heating/cooling platens and programmable controller.

◆ **Optional Portable Chillers available upon request**

■ No. 4393-ASTM Model AutoFour/15P-ASTM, 15 tons & No. 4394-ASTM Model AutoFour/30P-ASTM, 30 tons

Carver Auto Series self-contained press with heating/cooling platens and programmable controller. See pages 4 & 5 for press description.

Proppant Crush Test Press Models CMG28-12-PCR & CMG40-12-PCR Compatible with ISO 13503-2:2006

For use with frac sand, resin coated sand and ceramic proppant

Carver Inc. is proud to introduce Models CMG28-12-PCR & CMG40-12-PCR Proppant Crush Test Presses. These Monarch Series presses meet the critical demands of ISO 13503-2:2006 with unsurpassed cycle repeatability. The proportional hydraulic system is capable of applying a constant rate of 13.8 MPa/min. (2000 PSI min.) from 2 ton to 28 ton clamp force within a $\pm 2.5\%$ deviation. The operator interface allows easy setup of press control parameters and includes ample recipe storage.

- 28 and 40 ton models
- Hardened plates: 12" L-R x 12" F-B fully guided platens to ensure parallelism
- Positive stop on plates for centering the crush die
- Open daylight: 6"-12"
- Cylinder stroke: 6"
- Self-contained hydraulic system
- Available with and without 2" ID crush die (compatible with ISO 13503-2)
- "Mini" Viewpoint control system including:
 - Allen Bradley programmable controller
 - PanelView Touch Screen Interface
 - Closed-loop control of clamp pressure
 - Recipe storage (up to 30 recipes of 24 segments)
 - Two hand close buttons
- Polycarbonate safety guards around molding area with manual sliding interlocked operator gate
- Dimensions: 47" W x 34" D x 74" H
- Weight: 1,900 lbs.

No. 5456 Proppant Crush Test Cylinder

Based on ISO 13503-2:2006(E) Crush Cell
Cell: 2" ID x 3.38" tall including removable base, wall thickness is $>0.5"$

Piston: 3.5" tall

All parts constructed of D2 Tool Steel, hardened to 52-56 Rockwell C

CE available  US Panel available LISTED

CARVER[®]

Heated Manual Presses with Digital Temperature Controls & Safety Shields 7.5, 12, 25 and 30 ton capacity

(Thermostatic Temperature Control also available. Consult Factory for details)

Used for molding, laminating, embossing,
and bonding of various materials

No. 3690

No. 4386

No. 4120

No. 3856

No. 4126

No. 4128

7.5 TON PRESSES

- **No. 3690** (Model 7.5-15H)
 - Seven and a half ton, four-column press with 15" x 15" electrically heated platens
 - Designed for applications needing lower force over a larger area
 - Shown with optional digital gauge

12 TON PRESSES

- **No. 4386** (Model CH)
 - Twelve ton, manual, two-column hydraulic lab press with digital heated platens
 - Daylight up to 15"
 - Easy-to-read dual scale gauge, reading in pounds force and metric tons
- **No. 4120** (Model 12-10H)
 - Twelve ton, manual, two-column hydraulic press
 - Similar to No. 4386 press, but heavier construction and guided moving platen
 - Has electrically heated 10" x 7" platens for temperatures to 650° F with digital controller for each platen
 - Easy-to-read dual scale gauge, reading in pounds force and metric tons
- **No. 4122** (Model 12-12H)
 - Twelve ton, manual, four-column hydraulic press
 - Four-post construction assures parallelism over 12" x 12" surface
 - Easy-to-read dual scale gauge, reading in pounds force and metric tons
 - Has electrically heated platens for temperatures to 650° F with digital controller for each platen

- **No. 4123** (Model 12-12-2H)
 - Same press as No. 4122 except has four electrically heated platens with two 3" day lights
 - Optional water cooled platens also available

25 TON PRESSES

- **No. 4389** (Model MH)
 - Twenty-five ton, manual, two-column hydraulic press with digital heated 9" x 9" platens
 - Daylight opening is adjustable
 - Rigid cast iron and steel construction for precision and durability
 - Easy-to-read dual scale gauge, reading in pounds force and metric tons
 - Optional water cooled platens also available
- **No. 3856** (Model 25-12H)
 - Twenty-five ton, manual, four-column hydraulic press
 - Easy-to-read dual scale gauge, reading in pounds force and metric tons
 - Electrically heated 12" x 12" platens for temperatures to 650° F with digital controller for each platen
 - Optional water cooled platens also available
- **No. 3693** (Model 25-15H)
 - Twenty-five ton, four-column hydraulic press
 - The 15" x 15" heated platen area allows for larger work area
 - Standard with dual scale analog gauge
 - Easy-to-read dual scale gauge, reading in pounds force and metric tons

- **No. 4126** (Model 25-12-2H)
 - Same press as No. 3856 except has four electrically heated platens with two 3" daylights
 - Optional water cooled platens also available

30 TON PRESSES

- **No. 4128** (Model 30-12H)
 - Thirty ton, manual, four-column, hydraulic press
 - Has two-speed pump, first stage for rapid closing and second for pressing mode
 - Easy-to-read dual scale gauge, reading in pounds force and metric tons
 - 12" x 12" electrically heated platens for temperatures to 650° F with digital controller for each platen
- **No. 4129** (Model 30-12-2H)
 - Same press as No. 4128 except has four electrically heated platens with two 3" daylights
 - Optional water cooled platens also available

NOTE: Pictures shown with both analog gauge and digital gauge. Standard manual presses come with analog gauge. Digital gauges available upon request. Consult factory for details. Information on digital gauges may also be found on page 13.

SPECIAL 30 TON HIGH TEMPERATURE (1,100° F) PRESSES AVAILABLE. Consult factory for details.

Standard Unheated Manual Presses

12, 25 and 30 ton capacity

For pelletizing, destructive testing, fluid extraction, pressure forming, etc.

No. 3850

No. 3851

No. 3968

No. 3853

No. 3855

No. 3970

12 TON PRESSES

- **No. 3850** (Mini C)
 - Twelve ton, manual, two-column hydraulic press with 6" x 6" work area
 - Compact and portable, requiring less bench space than our Model C
 - This press is ideal for constricted bench space or glove box applications, as well as field work
 - It features adjustable daylight, steel construction for rigid precision and includes safety shield for operator protection
 - Easy-to-read dual scale gauge, reading in pounds force and metric tons
- **No. 4350**
 - Pellet press with 4" round platen
 - Available with and without pellet die (see page 10)
- **No. 3851** (Model C)
 - Twelve ton, manual, two-column hydraulic lab press
 - Similar to Mini C above, but larger, heavier construction with daylight to 18"
 - Easy-to-read dual scale gauge, reading in pounds force and metric tons

- **No. 3968** (Model 12-10)
 - Twelve ton, manual, two-column hydraulic press, with 10" x 7" work area
 - Similar to No. 3851 press described above, but heavier construction with fully guided moving platen and daylight to 14"
 - Easy-to-read dual scale gauge, reading in pounds force and metric tons
- **No. 3969** (Model 12-12)
 - Twelve ton, manual, four-column hydraulic press
 - Fully guided moving platen assures parallelism over 12" x 12" surface
 - Easy-to-read dual scale gauge, reading in pounds force and metric tons

25 TON PRESSES

- **No. 3853** (Model M)
 - Twenty-five ton, manual, two-column hydraulic press, with a 9" x 9" work area
 - Daylight opening is adjustable
 - Rigid cast iron and steel construction for precision and durability
 - Easy-to-read dual scale gauge, reading in pounds force and metric tons

- **No. 3855** (Model 25-12)
 - Twenty-five ton, manual, four-column hydraulic press with a 12" x 12" work area
 - Easy-to-read dual scale gauge, reading in pounds force and metric tons

30 TON PRESSES

- **No. 3970** (Model 30-12)
 - Thirty ton, manual, four-column, hydraulic press with a 12" x 12" work area
 - Has two-speed pump, first stage for rapid closing and second for pressing mode
 - Easy-to-read dual scale gauge, reading in pounds force and metric tons

Note: Existing Carver presses can be automated with an optional AutoPak power package (see back cover).

NOTE: Standard manual presses come with analog gauge (as shown in pictures). Digital gauges available upon request. Consult factory for details. Information on digital gauges may also be found on page 13.

Carver reserves the right to change specifications without notice. Presses and accessories may differ from photos shown. Carver strongly recommends the use of a safety shield and personal protection equipment when operating Carver equipment.

Shale Tech Solutions authorized distributor for Argentina

CARVER[®]

Presses for preparing pellets, bricks, briquettes and cakes

No. 4350, 12 ton Manual Pellet Press (less the die)

CE available

No. 3887 25 ton AutoPellet Press

CE available

UL US Panel available LISTED

Manual Pellet Presses (4350, 4555 & 4565)

The compact 12, 40 or 50 ton Pellet Press with 4" diameter platen is perfectly suited for KBr pellet pressing. It can also be used for Glove Box applications, compound and formula testing, compression strength tests, fluid extractions and on-site field testing. Includes integral Safety Shield, buffer plate and 13mm evacuable die. (not shown in picture)

AutoPellet Presses (3887 & 4387)

The self-contained 25 & 40 ton AutoPellet press has 5" diameter platen and integral safety shield cabinet enclosing electrically powered hydraulic system. Rigid slab side construction maintains precise alignment and includes provision for a vacuum line connection to the pellet die. The touch screen control interface allows for programmable force and programmable decompression rate.

AutoPellet 4387	40 (80,000)	5	N/A	1	1.5 to 7.25	32.5 x 19.75	22 (+ handle)	450

Note: Pellet Models with an "L" means less die. Additional Pellet Die sizes available below and on page 13 and 15 (sold separately).

Evacuatable Pellet Dies

Used with Pellet Presses to form the pellets for use in IR and x-ray spectroscopy. Complete with plunger, cylinder base plug, ejector and (2) polished anvils, along with a fitting for vacuum source connection when applicable. Constructed of 440 stainless steel. Available in sample diameter sizes 6, 12, 13, 25, 31 & 40mm. *Not recommended for use in heated presses.* (See pages 13 & 15 for additional details)

No. 5022 KBr Buffer Plate Kit

Assembly Includes: (1) KBr Buffer Plate (90mm diameter), mounts to the Top Bolster and (1) 9" x 9" hardened steel plate with centering grooves, mounts to the Moving Bolster on top of ram. For use with pellet dies and test cylinder outfits.

No. 3874 Vacuum Pump Kit

Used with pellet press to evacuate dies. (Available in 115 or 230V)

No. 5023 Set of (2) 6" x 6" Unheated Hardened Steel Plates

for smooth surface pressing. Steel Plates mount to top and moving bolsters.

No. 5024 Set of (2) 9" x 9" Unheated Hardened Steel Plates for smooth surface pressing. Steel Plates mount to top and moving bolsters.

No. 2090-0, 1.125" ID x 3" High, 440 Stainless Steel Test Cylinder Outfit (TCO)

No. 2091-5, 2.25" ID x 3" High, 440 Stainless Steel Test Cylinder Outfit (TCO) For use with standard unheated presses (excluding 4350 Series) for molding, forming bricks, briquettes, pressure forming, crushing, pressing plant and animal tissues, fluid extraction, extrusion and flow tests. *Not recommended for use in heated presses.* (See pages 13 & 15 for additional details)

No. 2090-1 Filter pads for 1.125" Test Cylinder Outfit. (set of 12)

No. 2091-1 Filter pads for 2.25" Test Cylinder Outfit. (set of 12)

No. 237005 Stainless Steel Pan

Used for fluid extraction when using the Test Cylinder Outfits and filter pads to make a sandwich sample. The stainless steel pan captures the released fluid.

No. 5021 KBr Buffer Plate Kit Assembly

Includes: (1) KBr Buffer Plate (90mm diameter), mounts to the Top Bolster and (1) 6" x 6" hardened steel plate with centering grooves, mounts to the Moving Bolster on top of ram. For use with pellet dies and test cylinder outfits. (Picture shows 5021 plate kit installed in 3851 press)

Pneumatic Low Force & Laminating Presses

Pneumatic Low Force Press

Carver's Pneumatic Low Force presses are fully guided with either two or four post construction. Benchtop or Floor Standing model presses available. The Pneumatic models provide accurate force control custom design to fit your specifications. Proportional force control or manual precision air regulator with analog gauge and/or digital force display options also available. Features include low friction seals in the clamp cylinder, linear ball bushings in the moving bolster and an optional integrated load cell design for accurate force feedback. Multiple clamp force and platen size configurations are available.

Please consult factory for details and available options.

€ available

UL LISTED US Panel available

Shown with enhanced control options

Laminating Presses

Manually operated hydraulic laminating presses with stacked heating and cooling platens in bench top model. Thermostatic control, aluminium platens, heating one opening while simultaneously cooling the other results in faster production of laminated samples, plastic plaques and other R&D items. Temperature control 150-500°F (Shown with analog gauge)

€ available

- No. 4130 (formerly 2112) Laminating Press, 12 ton capacity with Safety Shield**
Four 6" x 6" aluminum platens for one hot and one cold daylight opening. Thermostat control of heated platens in top opening as shown in picture to the left.
- No. 4132 (formerly 2630) Laminating Press, 30 ton capacity with Safety Shield**
Four 12" x 12" aluminum platens for one hot and one cold daylight opening. Digital control of heated platens in top opening.

CARVER®

Heating and Cooling Platen Options

Carver Heat Control Options

There are several levels of control for heating and cooling to give you a choice to meet the specific demands of your application.

Manual thermostat control Basic heated platens are controlled by an integral sensor and individual manual thermostats.

Digital control For more precise control, individual digital temperature controllers automatically control platen temperature from a separate control panel.

■ No. 3984

Digital control assembly for existing hotplates.

Manual cooling Manual water cooling permits hand operated cooling of platens with monitoring by analog thermometers for thermostatically controlled platens and digitally on the digital platen packages.

Note: All heaters are single phase unless otherwise noted.

CUL available for digital controls only

Optional Heat Tube Platens Available

For both Carver Benchtop and Floor Standing Presses

Accu-Heat™ Heat Tube Platens – For heat uniformity

- Accuracy and uniformity up to ± 1 F° approx.
- Standard sizes include; 6" x 6", 9" x 9", 12" x 12", 15" x 15", 18" x 18" and 24" x 24"
- Custom engineered sizes quoted upon request
- 500° F maximum temperature
- Heated/cooled configuration also available
- Can be designed to fit existing Carver or other brand presses
- Contact factory for details and/or to request a quotation

Laboratory Accessories for Carver Presses

Tile Mold

Plated steel or stainless steel frame with polished steel top and bottom covers. Can be used up to 400° F to form plastic or rubber sheets. Use with Carver heated, or heated and cooled platens.

Color Dispersion Disc Mold

For making plastic film to check color dispersion or clarity. Provides precise film thickness and parallelism. Made of stainless steel or hardened tool steel. Includes die, upper punch, lower punch and 3 spacers for optional film thicknesses.

Special Application Test Cylinder (See page 7)

Catalog Number	Description
5456	Based on ISO 13503-2:2006(E) Crush Cell; Cell: 2" ID x 3.38" tall including removeable base, wall thickness is >0.5" Piston: 3.5" tall; All parts constructed of D2 Tool Steel, hardened to 52-56 Rockwell C

No. 2092 Swivel Bearing Plates

Carver presses are frequently used for crushing and breaking tests of standard 2" x 2" cubes and 2" x 4" cylinders of concrete samples or similar crushing tests. Swivel Bearing Plates adjust slightly to the sample to assure proper application of pressure. **Requires safety shield.**

No. 818744C Punch and Die Holder

This punch and die holder permits off-line testing of pellet and tablet samples. It works with standard BB2 production tooling in most Carver presses, including Auto Series presses. The set includes an anodized aluminum holding fixture, steel shims to adjust for various size samples, and an anodized aluminum ejector. (does not include dies)

No. 2096CE & 2096-1CE Two Gauge Manifolds

The 2096CE is for most standard manual presses, except the Mini C. The 2096-1CE is specifically designed for the Mini C Model Press only. These manifolds permit mounting of both high (right) and low (left) range gauges for more precise application of force. Hand operated shut-off valve

protects low pressure gauge when using high pressure. **Analog Gauges sold separately.** (see page 15)

No. 6306 Digital Gauge

Optional digital force gauges for manual presses. Available in 10 or 100 pound increments. They are scaled per press model. Approximate accuracy: $\pm 1\%$ of reading between 1,000 lbs up to maximum tonnage of press (12, 25 or 30 tons). Consult factory for press details.

Platens for Model C Presses

(also available in deg C upon request)

- 2101** Set of (2) 6" x 6" heated, aluminium platens, thermostatically controlled, 150° to 500° F (Specify 115 or 230V)
- 2102.1** Set of (2) 6" x 6" heated, steel platens, thermostatically controlled, 150° to 500° F, (Specify 115 or 230V)
- 3796** Set of (2) 6" x 6", heated, steel platens, digitally controlled, 650° F, 115V
- 4286** Set of (2) 6" x 6", heated, steel platens, digitally controlled, 650° F, 230V
- 2103.1** Set of (2) 6" x 6" heated and cooled, steel platens, thermostatically controlled, 150° to 500° F with hoses (Specify 115 or 230V)
- 2104** Set of (2) 6" x 6" aluminum cooling plates, with valve and hose assemblies

- 3772** Set of (2) 6" x 6" heated & cooled steel platens, digitally controlled, 650° F, 115V
- 3988** Set of (2) 6" x 6" heated & cooled steel platens, digitally controlled, 650° F, 230V
- 2105** Set of (2) 6" x 6" aluminum steam plates, with insulation and braided hoses

Platens for Model M Presses (also available in deg C upon request)

- 2107.1** Set of (2) 9" x 9" heated, steel platens, thermostatically controlled, 150° to 500° F, (Specify 115 or 230V)
- 3973** Set of (2) 9" x 9", heated, steel platens, digitally controlled, 650° F, 230V

- 2108.1** Set of (2) 9" x 9" heated and cooled, steel platens, thermostatically controlled, 150° to 500° F with hoses (Specify 115 or 230V)
- 2109** Set of (2) 9" x 9" steel steam heating plates, with insulation and braided hoses
- 3972** Set of (2) 9" x 9", heated and cooled, steel platens, digitally controlled, 650° F, 230V

Platens for four-column presses (also available in deg C upon request)

- 3906** Set of (2) 12" x 12", heated, steel platens, digitally controlled, 650° F, 230V
- 3749** Set of (2) 12" x 12" heated and cooled steel platens, digitally controlled, 650° F, 230V
- 6316** Set of (2) 15" x 15", heated, steel platens, digitally controlled, 650° F, 230V

Accessories for Many Applications

MOLDS AND DIES

(See page 10 & 13)

Test Cylinders & Pellet Dies

- 2090-0** Test cylinder outfit, 1.125" ID
- 2090-1** Set of 12 filter pads for 1.125" ID TCO's
- 2091-5** Test cylinder outfit 2.25" ID
- 2091-1** Set of 12 filter pads for 2.25" ID TCO's
- 237005** Stainless steel pan for either TCO size
- 4417** 6mm pellet die 440 stainless steel
- 4946** 12mm pellet die 440 stainless steel
- 3619** 13mm pellet die 440 stainless steel
- 4369** 25mm pellet die 440 stainless steel
- 3902** 31mm pellet die, 440 stainless steel
- 3876** 40mm pellet die, 440 stainless steel
- 5456** 2" ID Proppant Crush Test Cylinder based on ISO 13503-2:2006(E) Page 7 & 13
- 2092** Swivel bearing plate (Requires safety shield)
- 2095** KBr buffer plate
- 818744C** Pharmaceutical pellet die holder

ASTM Molds

(See pages 7 and 13)

- 4079** 4" x 4" chase assembly, Teflon
- 4080** 4" x 4" chase assembly, Stainless steel
- 4081** 4" x 4" chase assembly, Brass
- 4082** 6" x 6" chase assembly, Teflon
- 4083** 6" x 6" chase assembly, Stainless steel
- 4084** 6" x 6" chase assembly, Brass
- 4085** 8" x 8" chase assembly, Teflon
- 4086** 8" x 8" chase assembly, Stainless steel
- 4087** 8" x 8" chase assembly, Brass
- 4161** (100) 6" x 6" mylar sheets for 4" x 4" molds
- 4162** (100) 8" x 8" mylar sheets for 6" x 6" molds

- 4163** (100) 10" x 10" mylar sheets for 8" x 8" molds

Tile Molds and Color Dispersion Disc Molds

(See page 13)

- 818698D** 4" x 4" tile mold, 1mm, 2mm & 5mm thick, Stainless steel
- 818699D** 6" x 6" tile mold, 1mm, 2mm & 5mm thick, Stainless steel
- 818700D** 10" x 10" tile mold, 1mm, 2mm & 5mm thick, Stainless steel
- 818701D** 50mm x 50mm tile mold, 1mm, 2mm & 5mm thick, Stainless steel
- 818702D** 100mm x 100mm tile mold, 1mm, 2mm & 5mm thick, Stainless steel
- 818703D** 150mm x 150mm tile mold, 1mm, 2mm & 5mm thick, Stainless steel
- 818704C** 50mm diameter color dispersion disc, 0.1mm, 0.2mm & 0.5mm thick, Stainless steel
- 818705D** 100mm diameter color dispersion disc, 0.1mm, 0.2mm & 0.5mm thick, Stainless steel

TESTING/PROCESSING

Polished Plates

- (For laminating applications)
- 235020** SS Plate with #8 mirror finish, polished on 1 side, 6" x 6" x 0.03" thick
- 235021** SS Plate with #8 mirror finish, polished on 1 side, 9" x 9" x 0.03" thick
- 235022** SS Plate with #8 mirror finish, polished on 1 side, 9" x 12" x 0.03" thick
- 235023** SS Plate with #8 mirror finish, polished on 1 side, 12" x 12" x 0.03" thick

Heated Test Cylinders

- 2472** 1.125" heated test cylinder
- 2417** 2.25" heated test cylinder

SAFETY SHIELDS

(See page 14)

- 3404** For most Mini C Presses
- 3295** For most Model C Presses
- 3253** For most Model M Presses
- 3322** For most presses with 10" x 7" platens
- 3418** For most presses with 12" x 12" platens
- 4427** For 3690 and 3693 with 15" x 15" platens

ANALOG GAUGES
(See page 13 for digital gauge options)

Gauges for Model B/C

- 381005** Gauge normally furnished with Model C press, 0 - 24,000 lbs applied force, 11 metric tons, 200 lb increments
- 381042** Model B/C gauge, 0 - 500 lbs, 0.225 metric tons, 5 lb increments
- 381001** Model B/C gauge, 0 - 1,000 lbs, 0.45 metric tons, 10 lb increments
- 381002** Model B/C gauge, 0 - 2,000 lbs, 0.9 metric tons, 20 lb increments
- 381003** Model B/C gauge, 0 - 5,000 lbs, 2.25 metric tons, 50 lb increments
- 381004** Model B/C gauge, 0 - 10,000 lbs, 4.5 metric tons, 100 lb increments

Gauges for Model K/M

- 381008** Gauge normally furnished with Model M press, 0 - 50,000 lbs applied force, 22.5 metric tons, 500 lb increments
- 381006** Model K/M Gauge, 0 - 5,000 lbs, 2.25 metric tons, 50 lb increments
- 381007** Model K/M Gauge, 0 - 10,000 lbs, 4.5 metric tons, 100 lb increments
- 381176A** Model K/M Gauge, 0 - 1,000 lbs, 0.45 metric tons, 10 lb increments

Two Gauge Manifold

(See page 13)

- 2096 C €** Two gauge manifold
- 2096 C €-1** (mini C only)

Dial Thermometers

- 385001** Dial face thermometer 150° F to 750° F
- 385019** Dial face thermometer 50° C to 400° C

HYDRAULIC UNITS

(Specify press Serial Number)

- 3912** 12 ton hydraulic unit
- 3925** 25 ton hydraulic unit
- 321007** Pump and reservoir for 30 ton presses
- 3467-0** Hydraulic cylinder for 30 ton presses
- 3729** 12 ton repair kit (gray only)
- 3730** 25 ton repair kit (gray only)
- 2170** Carver hydraulic fluid (pint size)

AUTOPAK™ POWER UNITS

(See page 16)

- 3946NE** AutoPak/12, for 12 ton existing manual presses.
- 3947NE** AutoPak/25, for 25 ton existing manual presses.
- 3948NE** AutoPak/30, for 30 ton existing manual presses.

FLOOR STANDS

(See page 14)

- 223160C** Press stand for 3690 & 3693 presses
- 223171D** Press stand for 2 column and 4 column presses
- 223215C** Press stand for 2 column and 4 column presses with casters
- 223321D** Press stand for standard PL Auto Series presses (excluding 48 ton models)
- 223319C** Press stand for standard PL Auto Series presses with casters (excluding 48 ton models)

Please feel free to visit our store by going to www.carverpress.com and/or consult factory for additional parts/accessories

Carver reserves the right to change specifications without notice. Presses and accessories may differ from photos shown.
Carver strongly recommends the use of a safety shield and personal protection equipment when operating Carver equipment.

Shale Tech Solutions authorized distributor for Argentina

Add Power to Existing Presses

AutoPak™ Power Units

- Self-contained 1/4 HP hydraulic power unit
- Develops maximum clamping force for most of our 12, 25 and 30 ton manual press models (minimum 1,000 lbs)
- Six feet of hose for connecting to existing Carver hand operated press
- Programmable control system (force only)
 - Touch screen interface
 - 10 recipe storage capability
 - 20 programmable segments of clamp force and dwell time per recipe
 - Programmable in units of pounds (also available in Kg, US tons, and metric tons)
 - Automatic bump sequence (can be programmed in any or all segments)
- Two-hand “anti-tie-down” close buttons for operator safety
- Interlocked switch for existing safety shield door included (See page 14 for recommended safety shield)
- 115V 1-Ph or 230V 1-Ph supply voltage (please specify)
- Electrical disconnect (non-fused)
- Approximate dimensions & weight: 24" L x 20" W x 21" H, 130 lbs

Custom Presses

Customized presses can be configured from the many options and accessories listed in this catalog. In addition, Carver engineers will work with you to design special presses for your particular application. Consult the factory for more information. Press shown is a custom designed Auto Series four column press with casters and built in floor stand.

Catalog No.	Model	Capacity (tons)	Supply Voltage (230V available upon request)
3946-NE	AutoPak/12	0.5 - 12	115V 1-Ph
3947-NE	AutoPak/25	0.5 - 25	115V 1-Ph
3948-NE	AutoPak/30	0.5 - 30	115V 1-Ph

Carver Warranty

Carver Inc. warrants all equipment we manufacture to be free from defects in workmanship and material when used under recommended conditions. The Company's obligation under this warranty is limited to those parts which within twelve (12) months from delivery of equipment to original purchaser are returned to the factory with transportation prepaid, and upon examination shall disclose them to be defective. Carver neither assumes, nor authorizes any other persons to assume any liability in connection with the sale of its equipment except under the conditions of this warranty.

This warranty does not cover any labor charges for replacement of parts, adjustment, repair or any other work done. This warranty shall not apply to any apparatus which in our opinion has been subjected to misuse, negligence or pressures in excess of limits recommended, or which shall have been repaired or altered outside of the Carver factory.

Replacement of defective material(s) will be FOB the Carver factory. Replacement of component parts not of its manufacture will be limited to the warranty of the manufacturers of such parts.

Warranty claims: Please contact our Service Department at 260-563-7577 ext 5238 or service@corpemail.com

Rely on Carver and WABASH Presses for Every Need

Carver, Inc. and WABASH MPI are sister companies located in Wabash, Indiana. For over 75 years WABASH MPI has met the challenge of designing and manufacturing standard and special presses for industry worldwide. Parts, service and support information are readily available. Ask to see installations of Carver or WABASH presses performing productively in your area. Consult with us to discuss all of your molding requirements.

WABASH manufactures 15 to 1,000 ton molding machines for elastomers and thermoplastics, Compression molding machines, C-Frame presses, Vacuum chamber molding and laminating presses and Trim presses. For more information on any of our presses call 260-563-1184, fax 260-563-1396, email: wabashleads@acscorporate.com, or visit our website at www.wabashmpi.com.
