

## Automated Compressive Strength Tester Forney Model F-250 Hydraulic Press

### Description

The Forney F-250 Press provides fully automatic, one touch testing for construction material test specimens. The Automated Hydraulic Press gathers all test parameters and data, compiles the results into a database format, along with printed results including load vs time graph, and automatically transmits the data to a user-defined location.

### Advantages

- Constant application speed of force
- Energy-efficient and quiet operation
- Technical and diagnostic support via remote connection
- Operation via touch screen panel with optional Spanish language display
- Automatically creates reports of the test into PDF format
- No computer required
- WiFi transmission of data

### Specifications

Parameters	
Capacity	250,000 lbf (1100 kN)
Ram diameter	6 in
Ram travel	2.5 in
Max vertical daylight*	19.5 in
Horizontal daylight	9.5 in
Shipping overall dimensions	26in x 40in x 53in**
Shipping weight	680 lb
*without tooling or spacers	
** without stand	

### Ordering Information

Part No. 102541081 — Automated Hydraulic Press Forney F-250, 115 Volt  
 Part No. 102540896 — Automated Hydraulic Press Forney F-250, 230 Volt
