

Expansion/Shrinkage Test Kit *Cement Curing Test*

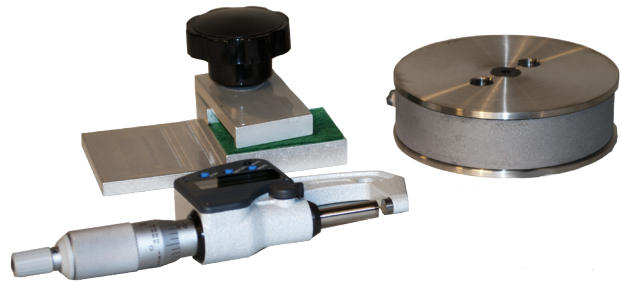

Description

The Expansion/Shrinkage Test Kit consists of a circular expansion mold (ring mold) and micrometer/guide base. Testing cement in this ring mold simulates the expansion or shrinkage of cement in the annulus of a well.

With some modification to the test procedure, shrinking properties can be measured.

Application

- Atmospheric Curing
- Pressure Testing (autoclave)
- Shrinkage Testing

Ordering Information

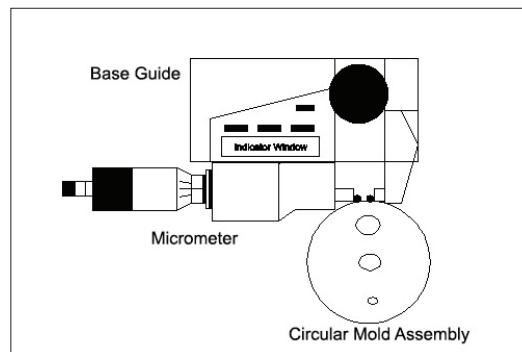

Part No. 205814— Expansion/Shrinkage Test Kit

Items Included:

Part No. 100020342— Mold Assembly

Part No. 101204060 — Micrometer and Base Guide

Part No. 102304066 — Spacer Block

Mold Assembly, Micrometer & Base Guide
